Summary

Full-Stack Developer and UI/UX Designer with experience building responsive web applications and user-centered digital products. Passionate about combining design thinking with modern web development to create intuitive, accessible, and impactful solutions. Proven ability to contribute across the entire product lifecycle, from research and prototyping to backend development and deployment.

Skills

- **Design Tools** Adobe Illustrator, Figma, Framer, Adobe Photoshop
- **Design Techniques** Wireframing, Prototyping, User Research, User Flows, Interaction Design
- **Languages** HTML, CSS, Typescript, C, SQL, Javascript, Node.js, React.js
- **Tools** Git, GitHub, Postman, n8n, pgAdmin

Education

Dayananda Sagar Academy of Technology and Management
Bachelor of Technology in Computer Science and Design-CGPA:8.6

2022 – 2026

Experience

Designer

Lxl ideas

Sept 2024 – Oct 2024

- Designed intuitive user interfaces for the Krayon educational application using Figma, focusing on accessibility, responsive layouts, and seamless user journeys.
- Redesigned the product landing page by improving information hierarchy, visual consistency, and overall user experience.
- Collaborated with developers and content teams to translate design concepts into implementation while maintaining a consistent design system.

UI Designer and Developer Intern

Hocon Technologies Pvt Ltd

April 2026 – August 2026

- Designed user interfaces and contributed to the development of the company's in-house ERP application, collaborating with the team to deliver business requirements.
- Worked on authentication, project dashboards, issue tracking, and dependency management modules to improve internal workflows.
- Designed PostgreSQL database schemas, managed databases using pgAdmin, and tested API endpoints using Postman to ensure seamless frontend-backend integration.
- Collaborated with stakeholders to gather requirements, improve workflows, and enhance the user experience through iterative development.

Projects

Lame rides

- Designed a user-centric public transport application featuring route planning, real-time bus tracking, and an intuitive navigation experience to simplify daily commuting.
- Conducted user research, created wireframes, prototypes, and high-fidelity UI designs in Figma, securing 1st Place at the Anokhya 2.0 UI/UX Competition.
- Tools: Figma, User Research, Wireframing, Prototyping, Interaction Design

Connect Smart

- Designed a smart home management application with customizable dashboards, device automation, and

intuitive control interfaces to enhance the user experience.

- Developed end-to-end user flows, interactive prototypes, and design systems, earning 3rd Place at the Tech Desafío UI/UX Competition.
- Tools: Figma, User Research, Prototyping, Interaction Design

My Glow

- Designed a beauty e-commerce application featuring personalized recommendations, interactive onboarding, streamlined shopping flows, and an intuitive checkout experience.
- Created user journeys, wireframes, and interactive prototypes to improve usability and engagement.
- Tools: Figma, User Research, Wireframing, Prototyping

Flow Sheet

- Designed a sales management application that digitized lead tracking, product management, and scheduling through structured workflows, replacing spreadsheet-based processes with an intuitive interface.
- Conducted user research and created wireframes and interactive prototypes to improve usability and workflow efficiency.
- Tools: Figma, User Research, Wireframing, Prototyping

Hocon-ERP

- Built a full-stack ERP application supporting user authentication, project dashboards, issue tracking, dependency management, and project workflows.
- Developed responsive frontend interfaces using React.js and implemented backend functionality using Node.js.
- Designed PostgreSQL database schemas using pgAdmin and tested backend API endpoints with Postman to ensure seamless frontend-backend integration.
- Tech Stack: React.js, Node.js, PostgreSQL, JavaScript, HTML, CSS, Git, Postman, pgAdmin, Figma
